Projects

Lead Programmer	**Capstone Project**	**STI College Batangas**	**08/2023 - 01/2024**

Online Booking System for Tingloy Ferry Passengers with SMS Notification:

- Led the development and design of our Capstone Project using the technology of PHP, MySQL, JavaScript, JQuery, CSS, and HTML.
- Create and implemented a well-structured website that displays the timetable of waiting and onboard trips with automated SMS notifications.
- Develop a module that stores passenger information through a computerized process that can be printable.
- Designed and create a module where the passenger can make advanced online bookings.
- Provide and implement a QR code-generated ticket for passengers who book online and develop a QR code scanner to verify these tickets.

Full-stack Web Developer	**Intern Project**	**DICT Region 4A CALABARZON**	**02/2024 - 04/2024**

Free Wi-Fi for All Monitoring System:

- Led the development and design of our Intern Project using the technology of PHP, MySQL, JavaScript, JQuery, CSS, and HTML.
- Developed, designed, and implement a system that store and manage information to be used in monitoring for FreeWifi4All.
- Designed and developed a printable report system of all Wi-Fi sites that established in Region 4A CALABARZON.
- Designed and developed a website that make data more easier to update.
